

Create custom paperless applications for any building in NYC— Absolutely any building!

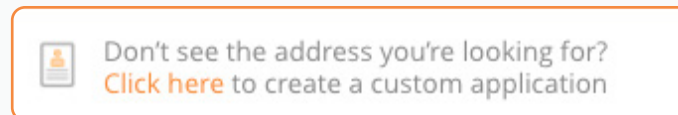

Use **BoardPackager** to go digital and work from anywhere.

Here's how:

1. Check to see if your building is on **BoardPackager**.

2. If a building is not listed yet, create a custom application from building search dropdown.

3. Insert property information and application type to start setting up the application.

A screenshot of a form for creating a custom application. The form is titled "Property Address" and "Property Name" and contains several input fields. The fields are: "Property Name" (with the value "Tower Terrace"), "Property Address" (with the value "1234 First Street"), "City" (with the value "New York"), "State" (with the value "NY"), "Zip Code" (with the value "10001"), and "Package Type" (with a dropdown menu showing "Condo Sale").

Custom paperless applications allow you to:

- :: Add deal parties
- :: Add documents
- :: Share with deal parties—
and choose who sees what
- :: Instruct your clients on application requirements
- :: Fill out and/or sign forms
- :: Submit to property management
through **BoardPackager**
